

## iDVD Tips for Teachers

Albums created in iPhoto can be sent to iDVD as a slideshow. Select the album, go to Share and down to Send to iDVD:

iDVD can also be accessed by itself in your Applications folder--select iDVD. Below is a snapshots of the iDVD interface explained:

### The iDVD Interface

As you go through the tutorial, you'll learn about the various controls and menus in iDVD. The main window, shown below, is your console for creating your DVD. From here, you can access almost every feature for creating and editing menus, and adding movies, photos, and music to create a dazzling DVD.

### Motion Button Tip:

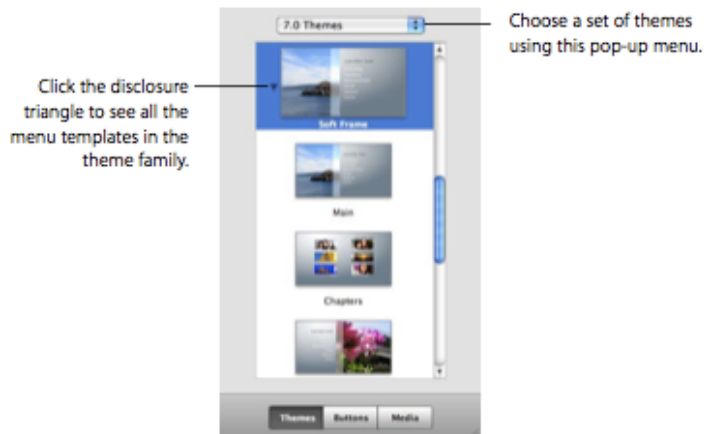

If you've already created a project, the iDVD window may open with an animated menu and music. Simply click the Motion button, shown below, to stop the animation and sound.

Motion button

## Choose a Theme for your Project:

The Soft Frame theme, like many iDVD themes, defaults to the widescreen format (16:9). To switch to standard format (4:3), choose Project > "Switch to Standard (4:3)."

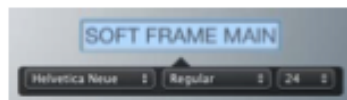

## Editing the Menu Title

When you create a new project in iDVD, the main menu of your project has a default title that matches the name of the menu theme. It's easy to change the title of your iDVD project.

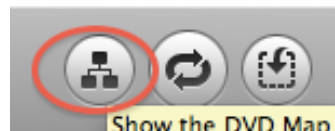

**To change the title text:**

- 1 Double-click the title, which highlights the text. An in-place editor, shown below, appears below the title.

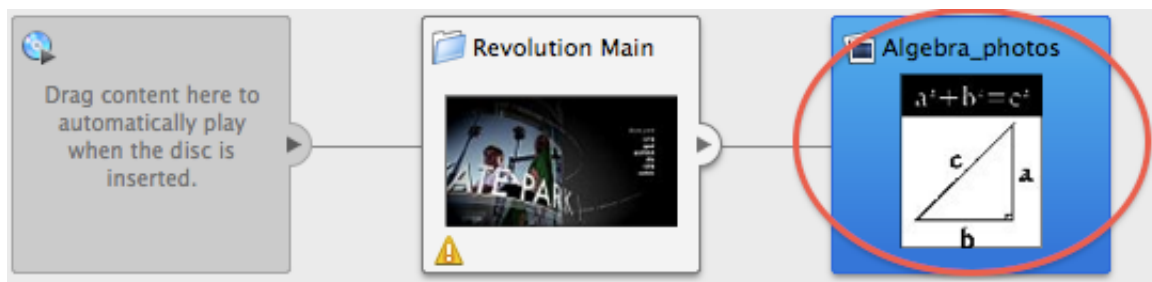

- 2 Type "Vacations" in its place.
- 3 If you want, use the controls in the in-place editor to change the typeface, style, and size of the title text.

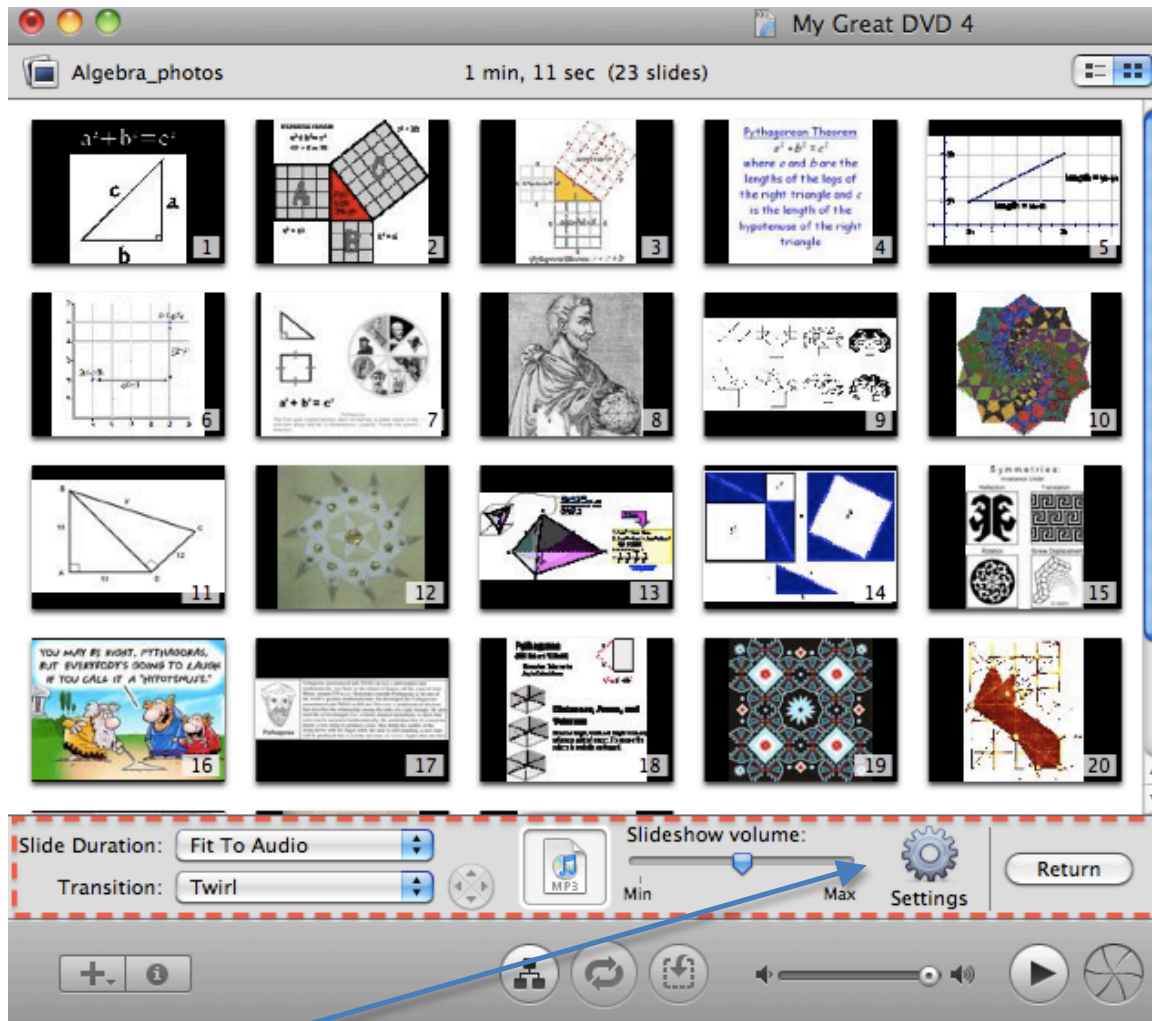

**To view your slides, add transitions, sound, etc., select "show the DVD map":**

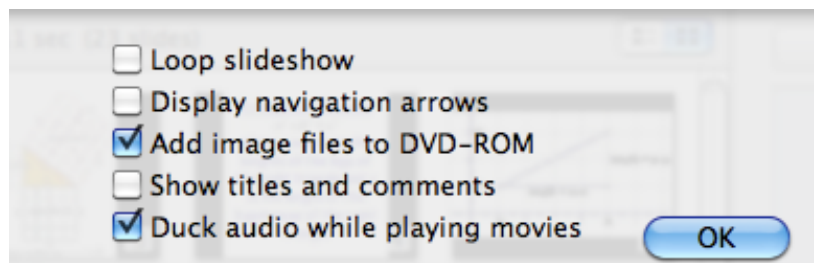

**Select your iPhoto show and double click to open up the photo slideshow:**

See area highlighted in red for your photo slideshow preferences; drag photos to the order you would like them to appear, change or add music and transitions:

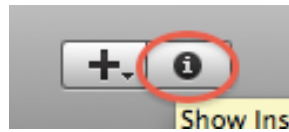

Select "Settings" to choose from the menu preferences for your DVD below:

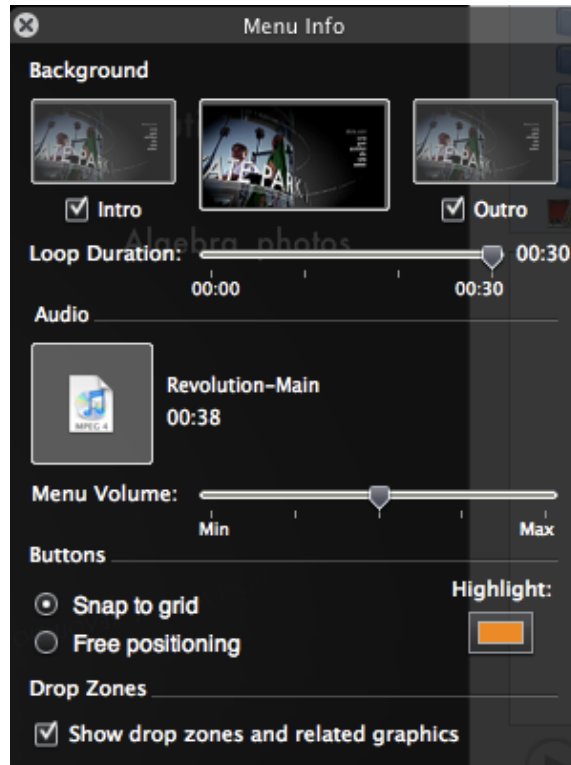

Return to the Main Menu - Select the Picture Area (Drop Zone), by selecting the tab shown below; add pictures from your iPhoto library by selecting the Media--Photos button:

**Make changes to your iDVD menu by selecting the “i” (Show Info) button:**

**Make changes to the Loop Duration, Audio, Button & Drop Zones in the Information Menu:**

**Preview your DVD by selecting the Play button; burn your DVD by selecting the Burn DVD button:**

**Visit the Help menu in iDVD to find a full edition of “Getting Started PDF” with iDVD and Video Tutorials:**
